Connecting to the Campus Wireless Network (Windows Vista)

1. Right-click on the icon for **Wireless Connections** in the system tray in the lower right-hand corner of the desktop.
2. Click **Network and Sharing Center**
3. Click **Manage wireless networks** from the Task menu
4. Click **Add**
5. Click **Manually create network profile**
6. Type **pirate** for Network Name, select **802.1x** for Security type, click **Next**

![Manually connect to a wireless network](image1)

7. Click **Change Connection Settings**
8. Select the **Security** tab

![pirate Wireless Network properties](image2)
9. Click Settings...

10. Click Configure...

11. Uncheck the box next to Automatically use my windows logon name and password (and domain if any).

12. Click OK button to this window, and each other property window that is open to close windows.

13. Once all the windows are closed, an alert will pop-up from the system tray in the lower right-hand corner. Click anywhere in this alert.
14. In the window that opens, enter your university user id in the User name field. Enter your university password in the Password field. Leave the Logon Domain blank. Click OK.

15. Now you will wait while your computer establishes a connection to Pirate. Click the Wireless Connection alert pop-up from the system try when it appears.

16. Once the validation is complete, simply click the OK button.

17. You are now connected.
