

Connecting iPhone and iPod Touch to *su-pirate* iOS v. 2.2 and above

To check the version of the software on your iPhone or iPod Touch, tap **Settings**, tap **General** and then tap **About**. Look at the number to the right of Version and make sure you are running at least version 2.2. If your device is running an earlier version, you will need to upgrade your device through iTunes.

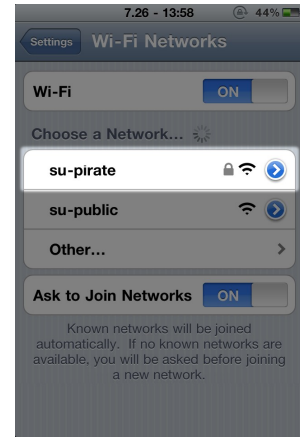

su-pirate is the name of the secure network at Southwestern. In order to connect your iPhone or iPod Touch to the *su-pirate* network, a few configuration steps are required. Once these are completed, you will not need to do them again to connect your device to the *su-pirate* network.

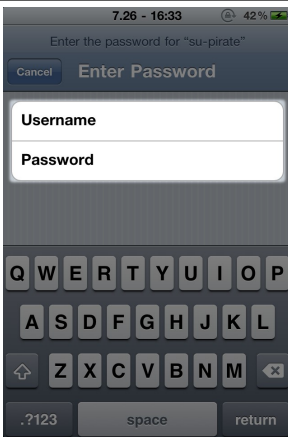

1. Tap **Settings** from your home screen.

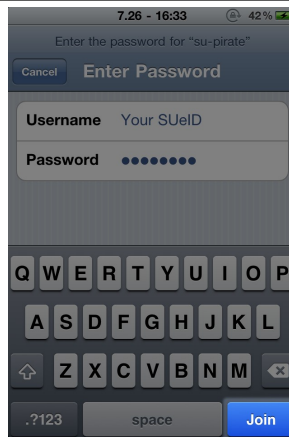

2. Tap **Wi-Fi**.

3. If your Wi-Fi is OFF, slide the switch to the right to **turn Wi-Fi on**.
4. In the list of networks that appears, tap *su-pirate*.

5. Enter your SUeID in the **Username** box, and your SUeID password in the **Password** box.

6. Press the **Join** button. If you do not see the button, ensure that you entered your SUeID from the previous step. Please wait as your identity is verified.
Note: a Certificate screen may appear. If this happens, tap the **Accept** button.

7. Wait a few more seconds and once you are connected, a check mark will appear next to *su-pirate* on the **Wi-Fi Networks** page indicating that you are connected to *su-pirate*.

If you are not able to connect to the pirate network after completing all of these steps, please contact the Help Desk at x7333 [512-819-7333] or helpdeskX@southwestern.edu
