

Connecting iPhone and iTouch to Pirate

Software Version 2.2

To check the version of the software on your iPhone or iTouch, tap **Settings**, tap **General** and then tap **About**. Look at the number to the right of **Version** and make sure you are running at least version 2.1. If your device is running an earlier version, you will need to upgrade your device through **iTunes**.

Pirate is the name of the secure network at Southwestern. In order to connect your iPhone or iTouch to the pirate network, a few configuration steps are required. Once these are completed, you will not need to do them again to connect your device to the pirate network.

1. Tap **Settings** from your screen icons.
2. Tap **Wi-Fi**.
3. Tap **Other...**

4. Enter **pirate** for **Network Name**.

5. Tap **Security** and tap **WPA2 Enterprise**.

6. Tap **Other Network**.

7. Enter your SUID for **Username** and your SUID password for **Password**.

8. Tap **Join**. It will take several seconds for your device to be recognized on the network.

9. On the **Certificate** screen, tap **Accept**.

10. Wait a few more seconds and once you are connected, a checkmark will appear next to **pirate** on the **Wi-Fi Networks** page indicating that you are connected to pirate.

If you are not able to connect to the pirate network after completing all of these steps, please contact the Help Desk at x7333 [512-819-7333] or helpdeskX@southwestern.edu
