

Mediterranean Mingling: Diversity and Cultural Intercourse
Cluster Description & Course Offerings
(courses marked with * have prerequisites)

Living in Texas, we are daily reminded of the relevance of diversity, migration, and exchange to the world around us. Famous for its wine, olives, and cheese, the Mediterranean, a sea of intersections and fluid borders, also serves as a useful model for understanding the global issues at the core of much contemporary and historical confluence and conflict. The cultural, historical, and ecological complexity where three continents--Europe, Asia and Africa--meet invites multiple perspectives and engages a broad range of interests, from art to food, faith to politics, language to literature and beyond.
