Desserts! Is Stressed Spelled Backwards: Balancing Your Physiological Health With Your College Transition
Maria Cuevas, Professor of Biology
An adequate balance between the feast (anabolic, storage, land of plenty) and fasting (catabolic, mobilization of energy) processes is considered necessary for long-term health and survival. It seems that a rapid pace of life, high demands, competitiveness, expectations of success, and efficiency characterize our current world (you may think-hhey this is happening right now with my move to college!). Thus, factors such as stress; lack of rest, recovery, and reconstitution may affect our health; and how stress influences our well-being.
